

The diagram illustrates a system architecture for a multi-channel quiet call. It features three user devices: a mobile phone (11) on the left, a cordless phone (16) at the bottom, and a desktop phone (17) on the right. Each device is connected to a central 'Telecommunications Infrastructure' (12), represented by a wavy line. The infrastructure is further connected to a 'Multi-Channel Quiet Call Technology' block (14), which is represented by a cube. This technology block is then connected to a user (17) sitting at a desk with a laptop. A speech bubble from the desktop phone (17) says 'Hi, I'm here'. A label '19' points to the mobile phone (11).
